find $e > 1$ such that $\gcd(e, (p-1) \cdot (q-1)) = 1$
find d such that $e \cdot d \equiv 1 \pmod{(p-1) \cdot (q-1)}$

$$\text{PK} = (N, e)$$

$$\text{SK} = (N, d)$$

to encrypt: $m^e \pmod{N}$

to decrypt: $c^d \pmod{N}$
