
LECTURE NOTES

Lecture 1: Intelligence

University

Simon Holm
April - 2026

DEPARTMENT OF MATHEMATICS
AND COMPUTER SCIENCE

Contents

1 Core concepts	3
2 Cognition	3
3 Intelligence	3

1 Core concepts

- Mental representation: Input is internally encoded
- Stages of processing: different stages of processing (superficial vs. deep encoding)
- Consciousness
- Cognitive architecture
 - Symbolic models: the mind is a computer
 - Connectionist models: the mind works over distributed neurons and layers

2 Cognition

Cognition is thinking

- Perception
- Language
- Memory
- Knowledge
- Learning
- Problem solving
- Intelligence
- Consciousness

Freedom lies within stimulus and response

3 Intelligence

A very general mental capability that involves the ability to

- reason, plan, solve problems
-
